

Title: Fundamental Research Manuscript Template

Author One^{a,1}, Author Two^{b,1}, Author Three^a, Corresponding Author^{a,b,*}

^a *Department of Chemistry, Key Laboratory of Bioorganic Phosphorus Chemistry and Chemical Biology, Tsinghua University, Beijing 100084, China*

^b *Skolkovo institute of Science and Technology, Skolkovo Innovation Center, 3 Nobel Street, Moscow 121025, Russia.*

* *Corresponding author: email_address@email.com (C. Author).*

¹ *These authors contributed equally to this work*

[#] *Footnote: Authors should be listed by first name followed by last name and separated by commas. Author affiliations should be listed according to the name order under the paper title. The corresponding authors' name should be listed after their email address in a bracket.*

(Do not include author name(s), affiliation(s), or any identifying detail on this page or anywhere else in this file when submitting a manuscript for double-blind peer-review)

ABSTRACT

[INSERT ABSTRACT HERE. – 150 to 250 words]

The abstract should state briefly the purpose of the research, the principal results, the research question, methodology, and principal finding or major conclusion. Do not include citations or undefined abbreviations. Non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself, such as “signal to noise ratio (SNR)”. Do NOT use the first person as subject. Do NOT repeat the title as the first sentence of the abstract. Simple sentence and active voice are preferred, and verb should be close to the subject.

Keywords: keyword one; keyword two; keyword three; keyword four; keyword five [5-7 comma separated words; use lowercase except technical terms. Abbreviations should contain full name with abbreviation included in parentheses.)

1. Introduction

State the research question or problem, why it matters, the objectives of the work and how the paper is organized, and provide an adequate background, avoiding a detailed literature survey or a summary of the results. Cite prior work using your chosen discipline's style — see the References section. Begin each paragraph with an equal indentation of two typing spaces.

2. Section Title [Literature Review / Background]

Situate the paper within existing scholarship or precedent. Adapt this heading and the ones below to whatever structure suits your discipline and manuscript type.

3. Section Title [Material and methods/experiment]

Explain how the research, analysis, or argument was conducted. For a doctrinal legal paper this may instead be a substantive analytical heading — adapt freely.

3.1. *Materials*

List the production information of all the materials and equipment were involved in the experiment and analysis.

3.2. *Methods*

Methods that are already published should be summarized, and indicated by a reference. If quoting directly from a previously published method, use quotation marks and also cite the source. Any modifications to existing methods should also be described.

3.2.1. *Method one in detail*

3.2.2. *Method two in detail*

4. Section Title [Findings / Analysis / Results / Discussion]

Present and discuss your results, argument, or analysis. Add or remove sections as your paper needs; renumber headings accordingly — they are auto-numbered in this template. Results should be clear and concise. The discussion should explore the significance of the results of the work, not repeat them. Avoid extensive citations and discussion of published literature.

4.1. Language

Manuscripts that are accepted for publication will be checked by our copy-editors for spelling and formal style. This may not be sufficient if English is not your native language and substantial editing would be required. In that case, you may want to ask a native speaker to help you or arrange for your manuscript to be checked by a professional language editor prior to submission. A clear and concise language will help editors and reviewers concentrate on the scientific content of your paper and thus smooth the peer review process.

Use of an editing service is neither a requirement nor a guarantee of acceptance for publication.

[FOR ENGINEERING AND SCIENCE SCHOLARS]

4.2. Format of figures

Regardless of the application used, when your electronic artwork is finalized, please "save as" or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below):

EPS: Vector drawings. Embed the font or save the text as "graphics".

TIFF: color or grayscale photographs (halftones): always use a minimum of 300 dpi.

TIFF: Bitmapped line drawings: use a minimum of 1000 dpi.

TIFF: Combinations bitmapped line/half-tone(color or grayscale): a minimum of 600 dpi is required.

Please do not:

- Supply files that are optimized for screen use (like GIF, BMP, PICT, WPG); the resolution is too low;
- Submit graphics that are disproportionately large for the content.

Please make sure that artwork files are in an acceptable format (TIFF, EPS or MS Office files) and with the acceptable resolution. And all the figures should be separated from main texts and listed after references.

4.3. Format of equation

Please insert math equations as editable text and not as images. Present simple formulae in line with normal text where possible and use the solidus (/) instead of a horizontal line for small fractional terms, e.g., X/Y. In principle, variables are to be presented in italics. Powers of e are often more conveniently denoted by exp. Number consecutively any equations that have to be

displayed separately from the text (if referred to explicitly in the text).

When the equation is separated with text, it should be displayed as:

$$E_f = \Delta E(Cu_{1-x}B_x) - (1-x)\Delta E(Cu) - x\Delta E(B) \quad (1)$$

where the symbol before the equation should be “:”, and the explanation of specific points should be listed after “where”.

4.4. Format of table

Number tables consecutively in accordance with their appearance in the text. Please put the table caption on the top and footnotes to the bottom. For each table, please supply a table caption explaining the components of the table. Start the table caption with “Table” in bold, followed by the table number, also in bold.

4.5. Use of footnotes

Footnotes should be used sparingly. Number them consecutively throughout the article. Many word processors can build footnotes into the text, and this feature may be used. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Do not include footnotes in the Reference list.

4.6. Use of units

The use of units in the texts should follow the *Scientific Style and Format* eighth edition, which was published by Style Manual Subcommittee, Council of Science Editors.

Usually, there should be a space between the number and the unit (e.g. 10 g). Specially, there is no space between the % and the previous number (e.g. 37%), but space is required when % turns into wt% or vol% (e.g. 57 wt%). For complex units, you can represent them with m/s or m s⁻¹, but you can only choose one format in the whole manuscript. Moreover, space is also required when operation characters are used in the main text (e.g. 1 x 10⁶).

5. Conclusions

Summarise the contribution and its implications. Avoid introducing new citations here.

Note on figures and tables: centre figures, with the caption centred beneath (e.g., “Fig. 1: Caption text”); place table captions above the table (e.g., “Table 1: Caption text”).

Number figures and tables sequentially and refer to each by number in the text. Do not embed any image, filename, or caption that could identify you or your institution.

Eg: Figures

Fig. 1. Each figure should have a concise caption describing accurately what the figure depicts. Captions should be supplied separately rather than attached to the figure. The caption should begin with the term “Fig.” in bold, followed by the figure number, also in bold. Keep text in the illustrations themselves to a minimum but explain all symbols and abbreviations used. **(a,b)** If a figure contains more than one panel, they should be denoted by lowercase letters “a, b, c, ...”, bold font without bracket, on the left top of the panel.

Declaration of Competing Interest

All authors are required to declare any Conflict of Interest (CoI) in detail, i.e., each author in individually by name must declare any potential CoI, and declare that s/he does not have any CoI. The CoI statement should list each author separately by name:

Author Two has received research grants from Drug Company A.

Author Three has received a speaker honorarium from Drug Company B and owns stock in Drug Company C.

The author one and corresponding author declare that they have no conflict of interest to this work.

Acknowledgments [if any]

If you used a generative AI tool anywhere in the research or writing, disclose it here in one or two lines — name the tool and its purpose only, nothing else. If not applicable, delete this

placeholder and keep the heading with “Not applicable.” Do not name people or your institution here — this file must stay anonymized.

For studies with human subjects and animals

For studies involving human subjects and animals, authors must also state that they conformed with the Helsinki Declaration of 1975, as revised in 2008 (5) concerning Human and Animal Rights, and that they followed out policy concerning Informed Consent as shown on Springer.com.

For studies with human subjects - All procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, as revised in 2008 (5). Informed consent was obtained from all patients for being included in the study.

If any identifying information about patients is included in the article, the following sentence should be included: Additional informed consent was obtained from all patients for which identifying information is included in this article.

For studies with animals - All institutional and national guidelines for the care and use of laboratory animals were followed.

Electronic supplementary materials

(Fundamental Research accepts electronic multimedia files (animations, movies, audio, etc.) and other supplementary files to be published online along with an article.

If supplying supplementary materials, the text must make specific mention of the material as a citation, similar to that of figures and tables. Please refer to the supplementary files as “online”, e.g., “...as shown in the animation (Fig. S1 online)”, “... additional data are given in Table S1 (online)”.

For each supplementary material, please supply a concise caption describing the content of the file.

References

Choose the ONE track below that matches your discipline. Delete the other three, and replace every sample citation with your own sources. Apply your chosen style consistently throughout the manuscript — mixing formats is grounds for return at the screening stage.

A — Law: Indian Law Review Format / Bluebook (20th ed.)

Law submissions use footnotes, not a references list. Insert them with Word's References → Insert Footnote, and set the footnote text style to Times New Roman, 10pt, single-spaced (this template's Footnote Text style is already set that way — do not change it).

For example, a Supreme Court decision cited in the body of a legal argument might carry a footnote marker like this ¹.

- High Court case: *Shreya Singhal v Union of India (2015) 5 SCC 1 (Delhi HC)*.
- Statute: *The Information Technology Act 2000, s 66A*.
- Journal article: *Author Name, 'Article Title' (Year) Vol Journal Abbrev Page*.
- Book: *Author Name, Book Title (Publisher Year) Page*.
- Online source: *Author, 'Title' (Website, Date) <URL> accessed Date*.

B — Sciences / Medicine: APA 7th Edition or Vancouver Style

Use a reference list titled “References” at the end of the manuscript. Pick APA or Vancouver — not both.

- Journal article (APA): *Smith, J. A., & Patel, R. (2023). Title of study. Journal Name, 45(2), 112–128. <https://doi.org/xxxxx>*
- Journal article (Vancouver): *Smith JA, Patel R. Title of study. J Name. 2023;45(2):112-28.*

¹Maneka Gandhi v Union of India (1978) 1 SCC 248 (SC).

- Book (APA): *Author, A. A. (Year). Title of work: Capital letter also for subtitle. Publisher.*
- Website (APA): *Author, A. (Year, Month Day). Title of page. Site Name. URL*
- In-text (APA): *(Smith & Patel, 2023, p. 115)*
- In-text (Vancouver): *As demonstrated in earlier trials [1,2]...*

C — Social Sciences / Management: APA 7th Edition or Chicago Author-Date

Use a reference list titled “References” at the end of the manuscript. Pick APA or Chicago Author-Date — not both.

- Journal article (APA): *Sharma, P., & Kumar, V. (2022). Organisational dynamics in post-pandemic firms. Management Review, 18(3), 45–60.*
- Journal article (Chicago): *Sharma, Priya, and Vikram Kumar. 2022. “Organisational dynamics.” Management Review 18 (3): 45–60.*
- Book (APA): *Sen, A. (1999). Development as freedom. Oxford University Press.*
- Report / policy document: *NITI Aayog. (2022). Annual report 2021–22. Government of India.*
- In-text (APA): *(Sharma & Kumar, 2022)*
- In-text (Chicago): *(Sharma and Kumar 2022, 47)*

D — Arts & Humanities: MLA 9th Edition or Chicago Notes-Bibliography

Use a Works Cited list (MLA) or footnotes with a bibliography (Chicago Notes-Bibliography) — pick one, not both.

- Book (MLA): *Ambedkar, B. R. Annihilation of Caste. 3rd ed., Critical Quest, 2007.*
- Book (Chicago footnote): *¹ B. R. Ambedkar, Annihilation of Caste, 3rd ed. (Critical Quest, 2007), 45.*

-
- Journal article (MLA): *Author, First. "Title." Journal Name, vol. 5, no. 2, 2022, pp. 10–25.*
 - Article (Chicago note): ² *First Author, "Title," Journal Name 5, no. 2 (2022): 15.*
 - In-text (MLA): *(Ambedkar 45)*
 - Website (MLA): *Author. "Page Title." Website Name, Day Month Year, URL.*

*If you are unsure which track applies to your discipline, email **submissions@jirmi.in** before submitting.*
